SUMMARY

Passionate and experienced web developer with over 5 years of experience in designing and implementing high-quality web applications. Proficient in a range of technologies, committed to delivering exceptional user experiences.

EXPERIENCE

Freelance Web Developer

Jul 2019 - Present, Prishtine

- Delivered high-quality web apps using **React** and **WordPress**.
- Created admin dashboards, landing pages, and form-based UIs with Framer Motion and GSAP animations.
- Built client-facing websites and business tools for companies including **Maestro Garage**, **NyInterboro Construction (US)**, **Yzzat LLC**, **Dec Projects**, and **FTSolutions (accounting agency)**.
- Currently developing a responsive business website for Reuss Blick, a Swiss-based textile care company, focused on showcasing services, pricing, and contact details in a bilingual layout optimized for desktop and mobile.

Full-Stack (Front-end focused) Developer

PRonins

May 2021 - Mar 2022, Prishtine

- Collaborated with PRoninson several web applications using **React**, **GraphQL**, and **Node.js**.
- Currently developing internal tools and dashboards using **TypeScript**, **Prisma**, and **Redux Toolkit**.

Front-end Developer

Kutiza L.L.C

Mar 2022 - Oct 2023, Prishtine

- Developed a health insurance CRM platform with React (mobile-first, responsive UI) and integrated it with a Laravel backend via REST APIs.
- Contributed to two connected systems:
 - A client-facing portal where customers manage their health insurance.
 - An administrative CRM that centralized multiple smaller CRMs into one main platform.
- Implemented features in both **React** and **Vue** (for legacy modules) ensuring smooth interoperability.
- Collaborated in a cross-functional team to deliver a product successfully launched and sold in Switzerland.

Full-Stack Developer

NewFive (Netherlands)

Oct 2024 - Aug 2025, Remote

- Contributed as a full-stack developer, deepening expertise in modern web technologies and scalable architecture.
- Built and maintained production-ready Shopify apps, including **Sync Fusion**, a marketplace app designed to batch-update grouped product inventories.
- Worked extensively with **React JS**, **Next JS**, **Node.js**, **GraphQL**, and **Polaris**, ensuring seamless integration with the Shopify admin and providing an intuitive user experience.
- **Implemented email marketing workflows in Klaviyo**, creating responsive campaign templates and automated flows (welcome, post-purchase, cart recovery) to improve retention and engagement.
- Applied **conversion rate optimization (CRO)** strategies using analytics tools and A/B testing, iterating on storefront design and campaigns to boost customer acquisition and average order value (AOV).

Computer Science & Math Teacher

American School of Kosova — Prishtinë

Aug 2025 – Jan 2026

- Teaching Computer Science and Mathematics to middle school students, with a focus on algorithms, computational thinking, and JavaScript.
- Helped design and implement the CS curriculum, ensuring it meets international standards while being engaging and age-appropriate.
- Guiding students in building a strong foundation in problem-solving, logical reasoning, and coding skills.

Freelance and building personal brand

American School of Kosova — Prishtinë

Jan 2026 – Present

- With the knowledge accumulated until now, I have made the decision to make my own brand and offer AI-Powered solutions.
- Currently building different websites, and one gigantic web application, which will be announced soon.

PROJECTS

Sync Fusion Shopify [\(Link\)](#)

Developed a Shopify app that batch-updates grouped inventories using React, Polaris, GraphQL, and Node.js.

Designed for scalability, intuitive user flow, and Shopify-native UI consistency.

Other Projects

Appointment management platform for internet cafes, supporting real-time reservations, queue tracking, and session duration controls. Initially targeted at the local market to meet the specific needs of regional internet cafes and to promote digital transformation in underserved tech areas.

Animated portfolio websites with immersive UI interactions using **GSAP**, **Framer Motion**, and **Three.js**.

Simple but effective SPAs built with **React** and **Redux**, focused on clean **UX**

Shopify storefronts and WordPress websites tailored to small businesses, including booking pages, service listings, and landing pages.

EDUCATION

Bachelor of Computer Science and Engineering

UBT / College • Prishtine • 07/2018 - 07/2022

- Specialized in Web Development
- Shopify Academy: B2B on Shopify: Launch and Customization and Liquid Storefronts for Theme Developers.
