SUMMARY

Passionate and experienced web developer with over 5 years of experience in designing and implementing high-quality web applications. Proficient in a range of technologies, committed to delivering exceptional user experiences.

EXPERIENCE

Freelance Web Developer

07/2019 - Present, Prishtine

- Developed multi-page web applications, blogs, single-page apps, and CMS using React, Shopify and WordPress.
- Adapted to diverse client requirements and goals, ensuring optimal performance and timely delivery.

Full-Stack (Front-end mainly) Developer

PRonins

05/2021 - present, Prishtine

- Collaborated with PRonins agency for some years, working on different projects.
- Mainly used React JS and Wordpress, currently working as full stack with Node JS, Prisma, GraphQL and some Typescript.

Front-end Developer

Kutiza L.L.C

03/2022 - 09/2023, Prishtine

- Developed a CRM system focusing on delivering a seamless user interface across devices.
- Collaborated effectively within a team to achieve high-quality results.

Full-Stack Developer

NewFive (Netherlands)

10/2024 - present, Remote

- Contributed as a full-stack developer, deepening my expertise in modern web technologies and scalable architecture.
- Built and maintained production-ready Shopify apps, including Sync Fusion, a marketplace app designed to batch-update grouped product inventories.
- Worked extensively with React JS, Node.js, GraphQL, and Polaris, ensuring seamless integration with the Shopify admin and providing an intuitive user experience.

PROJECTS

Machine Learning Project

- Developed a project using Python and algorithms like KNN, KM Clustering, Linear Regression, SVM, and Regression.
- Delivered precise predictions using dummy data.

Other Projects

- Blogs, appointment management application (MERN), e-commerce platform (Django, Vue JS).
